Product Description

DL1302H Debris Loader

An ideal combination of power and size, at 2,100 cfm of commercial suction, the DL1302H is the perfect truck loader for small to midsize jobs and crews. The all-new discharge chute offers long-life productivity. This unit will get you into high productivity leaf and debris removal at a light weight and low overall cost. Save time and dump fees with a dual shredding 14.25" diameter armor plate impeller with a Piranha™ blade that reduces debris up to 12:1 and maximizes trailer loading across multiple properties before dumping. This unit also has CustomFit™ features that allow you to customize the loader to your truck.

Features -

Square Discharge Elbow

This all-new feature offers increased durability, longer life, and ease of service.

Dual Shredding System with Piranha Blade

For extra shredding. Serrated blades with cutting points for maximum truck loading and debris reduction up to 12:1.
